

Biki Balami

Full Stack Developer & UI/UX Designer | Born 1999/07/22

bikibalami1999@gmail.com | [LinkedIn](#) | [bikibalami.netlify.app](#)

Summary

I specialize in **Next.js, React and TypeScript**. I have a deep understanding of Next.js 13+ and I have experience integrating a Full Stack Next.js app with **AWS services (cognito, amplify, lambda, dynamoDB, API gateway)**. I can also integrate secure **backend APIs** with **Node.js** and **Databases** with **SQL languages** like **PostgreSQL**. With a degree in **Graphic Design** I am skilled at designing web **UI/UX**, I am a full package. I have **lead** a small team of engineers and designers, with experience in **hiring, managing, and mentoring** a team to create and deploy a multi-faceted **SaaS**.

Technical Skills

- 1. Frontend** : HTML5, CSS3, JavaScript (**React.js, Next.js, TypeScript**), UI/UX, Graphic Design, REST APIs
- 2. Backend** : Node.js, Express.js, PostgreSQL, Prisma, Python
- 3. DevOps** : **AWS** (Amplify, Cognito, DynamoDB, Lambda, API Gateway, S3)
- 4. Tools** : Git/GitHub, **Figma**, Adobe Photoshop/Illustrator, Blender3D
- 5. Core** : Responsive Web Apps, Web Accessibility, Performance Optimization (Next.js, CSS)

Developer Work Experience

- 1. Full-Stack Developer & Technical Team Lead** | *Ukudala Ltd, Novobooks project (2025 April - 2025 July)*
 - » **MVP deployment:** Co-led the deployment of a **SaaS MVP**, integrating features like project management, book publishing, role-based accounts, chat, crowdfunding, and notification systems.
 - » **Team Lead:** Led and mentored a team of talented designers, frontend & backend engineers. Contributed to hiring decisions and mentoring junior developers. Promoted to a leadership position within 4 weeks.
 - » **Frontend architecture:** Architected and implemented core frontend systems across several key areas: routing (40+ pages), authentication and authorization, backend integration, Next.js API routes/handlers, system optimization, system efficiency, and the development of modular and typesafe UI components.
 - » **AWS integration:** Contributed on initiating and configuring an AWS system (**Amplify, Cognito, DynamoDB, Lambda, API Gateway**). With a key focus on managing Amplify deployments and Cognito authentication, including resolving version-specific issues and *AWS quirks*.
 - » **Solo Migration:** Single-handedly migrated application from React to Next.js, improving performance and SEO capabilities. While also architecting an improvement upon the logic behind the system with SSR and CSR.

Non-Developer Experiences

- 2. Leader Teaching Assistant** | *Academic English Program, Temple University Japan (2021–2023)*: Managed multiple classrooms independently; promoted from TA to Leader TA. Mentored 10+ junior TAs.
- 3. Freelance Graphic Designer & Digital Marketer** | *Newa Pasa Restaurant and Bar (Family business)*: Redesigned systems/menu, boosted customer acquisition 50%, order efficiency 100%; influenced key business decisions.
- 4. Leader Designer** | *Uprizine Club (2021–2023)*: Led 40+ member global team to publish 4 digital zines (Adobe InDesign, Illustrator) archived at Temple University.

Passion Projects

- 1. Pachiku** – *Full-Stack Social Media Platform* | **Next.js, TypeScript, React, NextAuth** | [Visit Website](#) | [GitHub](#)
 - a. Developed a **full-stack social app** with core features (likes, comments, shares, dashboards) using **Next.js App Router, SSR/CSR, Server Actions, Google OAuth, Prisma (PostgreSQL)**, and custom neo-skewmorphic UI.
- 2. Pachiku** – *Responsive Single Page Application* | **React.js** | [Visit Website](#) | [GitHub](#)
 - b. Created a modern, single-page portfolio with post-modern styling, and responsive design.

Education & Certifications

- 1. Bachelor's Degree** | *Temple University Japan* (Dec 2023)
 - a. Minor in **Computer Science: Python, C, Java, Data Structures, Mathematics**
 - b. Major in **Art (Graphic Design): UI/UX Design (Figma), Adobe Suite, Digital Art**
- 2. Professional Certifications (7 Total)**
 - a. **Codecademy (2024):** 1. **Front-End Engineer Path** (HTML, CSS, JS, Redux, Web APIs), 2. **Learn Next.js**, 3. **Learn Git & Github**, 4. **Learn React**, 5. **Learn TypeScript**
 - b. **Udemy:** - 1. **Mastering TypeScript (2024)**, 2. **Figma UI/UX Design Advanced (2023)**
